History:

At the beginning of every job you will get a dossier like this one. It will give you all the information you need to get started and these folders are also a handy place to organize any new information you get. We have included a handout that will guide you through the entire capture process. Good luck!

Notes:

There should be plenty of GP reps in the area. Please talk to them if you have any questions or problems. This is simply a training session and you should not sit and grind on any decoding.
